1edo - The Magnetic Charging Ecosystem Guide

One connector, every device

The 1edo rotating magnetic connector snaps onto a USB-C cable and rotates 135-360 degrees, so the cable never fights your grip.

Build your kit

1. Pick a GaN wall charger with enough wattage.
2. Add a 3A or 5A magnetic cable for each desk.
3. Keep a magnetic power bank for travel.

Compatibility

Any USB-C phone, tablet or laptop charges by cable. Magnetic alignment is a convenience feature, not wireless charging.
